Catalog of Hardy Perennials
Evergreens & Bulbs & Roots & Shrubs

U S DEPT OF AGRICULTURE

BUREAU OF PLANT INDUSTRY

WASHINGTON DC.

GLADIOLA ASSORTMENT SPECIAL

This assortment consists of 72 bulbs, as listed below, covering a wide range of colors, and is especially recommended for the home garden. They require little attention, and give equal satisfaction whether left to finish their bloom in the garden, or whether cut and used as house decorations. If kept in fresh water the blooms will last for a week or ten days.

When planted among Iris, they produce a most pleasing effect, and are very useful in constructing landscape development.

Plant as soon as danger of frost is over and continue doing so at intervals of two or three weeks up to July. This provides a succession of blooms. Bulbs should be taken up in fall after the tops have been cut down by frost, and kept in a cool place during the winter.

- 6 Maidenblush, Salmon-pink.
- 6 Capello, Red.
- 6 Alice Tiplady, Orange.
- 6 Salmon Beauty, Salmon-pink.
- 6 Jewell, Light salmon-pink.
- 6 Le Marechal Foch, an exquisite pink.
- 6 White Giant.
- 6 Mrs. Frances King, Brilliant pink.
- 6 Baron J. Hulot, Violet-blue.
- 6 Crimson Glow, Crimson, very tall.
- 6 1910 Rose, Rose color.
- 6 Schwaben, Shaded canary-yellow.

Terms

The prices in this catalog are for bulbs and plants properly packed and delivered to the express or freight office in Deerfield, free of all charges. Express or freight charges for transportation from Deerfield must, however, be paid by the purchaser.

It is our custom to ship our goods by express, as we find the service more satisfactory, and as a rule, cheaper, owing to the size and weight of the packages. If any customer prefers the Parcel Post, we will forward small packages in this manner, provided sufficient postage is remitted with the order. Any excess will be returned.

We guarantee our bulbs and plants to be true to name, healthy and in sound condition and strictly first class. We will not, however, be responsible for the failure of any to grow or thrive, as such failure may result from causes wholly beyond our control, such as improper treatment, unfavorable weather, soil or climate. Should any difficulty arise through any fault or mistake of our own, we will gladly rectify it. If the purchaser does not accept the goods on these terms, they are at once to be returned, and any money that has been paid for same will be refunded.

SERVICE

Our Service Department is organized for those customers needing general landscape service, where grading, preparation of the beds, laying out walks and drives, building of pools, rock gardens, rustic work, seeding of lawns, are required.

On orders amounting to \$20.00 or more, our Service Department will deliver within a radius of 20 miles and plant any stock listed in this catalog, at an additional charge of 25%.

Preparation of beds, fertilizer and black dirt, extra.

REPLACEMENTS

Owing to hazards over which we have no control, we do not guarantee our stock, but will replace stock planted by our Service Department, which proves unsatisfactory within two years, provided one-half our "each" list price accompanies the order for replacement.

PLAN TO SEE OUR PHLOX^{es} WHEN IN BLOSSOM

We wish to inform our customers that our methods of producing Phlox are far superior to the ordinary Phlox sold to the Public, as we actually use in our system of propagation, two years to produce a single plant. All the Phlox offered in this list, are from one-year plants, transplanted and grown a second season, which assures you of a much better plant than those either from divisions of old plants, or one year from cuttings.

PHLOX SPECIAL

Phlox are unsurpassed for large masses of color in the late summer and autumn. They bloom in July and August, a time when bright colors and masses of bloom are very scarce. They grow from two to three feet high, with the exception of a few varieties. They require only ordinary garden cultivation.

For the benefit of our customers who wish to establish a fine selection of Phlox, we have selected 15 varieties that are sure to please and give complete satisfaction.

This special selection consists of 45 plants, as follows:

- 3 Rheinlander, Salmon-pink, claret eye.
- 3 R. P. Struthers, Rosy-red, crimson eye.
- 3 Rynstrom, Clear pink.
- 3 Thor, Salmon-pink, dark eye.
- 3 Riverton Jewel, Mauve-rose.
- 3 Jeanne d'Arc, Pure white.
- 3 L'Evenement, Lilac-pink.
- 3 Antonin Mercie, Grayish-lilac.
- 3 Eugene Danzanvilliers, Lilac-blue.
- 3 Widar, Violet-blue, white eye.
- 3 Wandid, Lilac-blue, violet eye.
- 3 Europa, White, crimson eye.
- 3 Mrs. Chas. Dorr, Solid blue mauve.
- 3 Mrs. Jenkins, Immense pure white heads.
- 3 W. C. Egan, Lilac-pink.

DAHLIA SPECIAL

As we are going to discontinue the growing of Dahlias, we have decided to close out our entire selection as listed on page 15. Any ten, one each your selection, \$4.00.

Ten, our selection, one each, \$3.00. These prices are only good while our selection lasts. To avoid delay, choose one or two extra varieties, which we may use as a substitute in case we are sold out of any of those you may have chosen.

IRIS SPECIAL

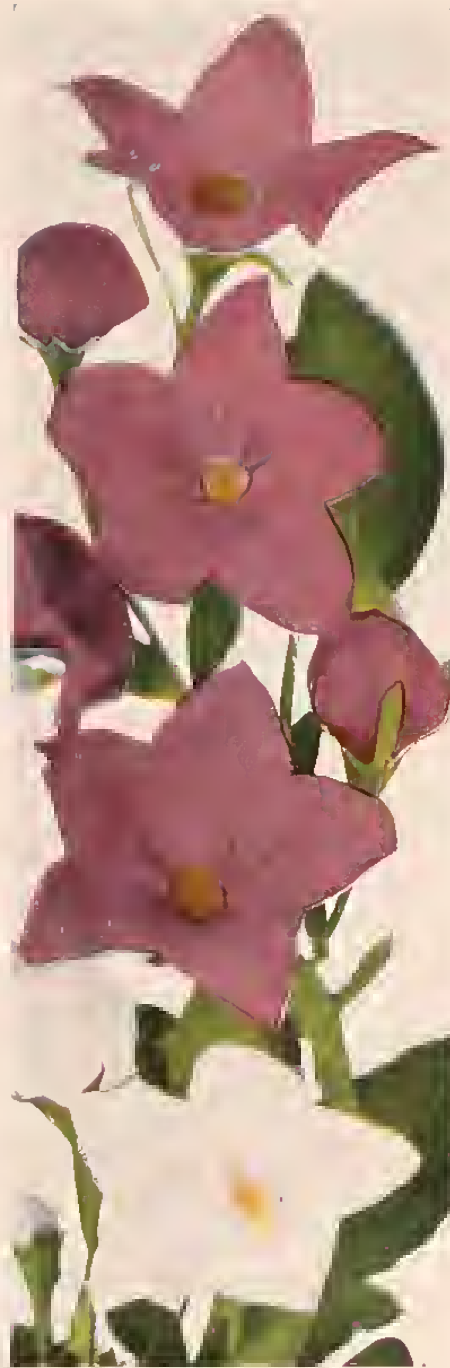

The German Iris is extremely hardy and grows luxuriantly everywhere, particularly in a dry and sunny location. Its spikes of flowers are fragrant and fine for cutting. If cut when the lower buds show color, they will open nicely in the house. In planting, be particular to barely cover the Rhizomes, or large fleshy roots.

The petals that stand skyward are called the Standards, and the ones that hang so artistically are called Falls. These lovely flowers bloom in May and June.

This special offering of Iris includes 10 plants each of five popular varieties, as described below:

- 10 Albert Victor, blue and lavender.
- 10 Caprice, rosy-red.
- 10 Her Majesty, rose-pink.
- 10 Loreley, yellow and cream.
- 10 Queen of May, rose-lilac.

PLATYCODON, BELLFLOWER (Perennial)—A hardy Campanula, bearing a multitude of showy bell-shaped flowers that bloom in succession from July to October.

COREOPSIS (Perennial)—Is a beautiful hardy border plant. Grows 15 to 18 inches high and produces its bright, golden flowers in great profusion the entire summer. Fine for cutting.

DIANTHUS, SWEET WILLIAMS (Perennial)—Colors range from purest white to darkest red with an infinite number of combinations of colors. Grow from 1 to 3½ feet tall and bloom all summer.

LARKSPUR, DELPHINIUM GOLD MEDAL (Perennial)—One of the most attractive garden flowers. Having a beautiful shade of blue and growing on tall stems. Grows 4 feet tall. Blooms from June to July.

ROCKY MOUNTAIN COLUMBINE (Perennial)—Handsome foliage and magnificent clusters of long spurred flowers of white and blue on long stems. See color illustration above.

GAILLARDIA (Perennial)—These deserve a place in all gardens. They are showy, bloom under adverse conditions and are easy of culture. Grow 2 feet tall. Bloom during the Summer.

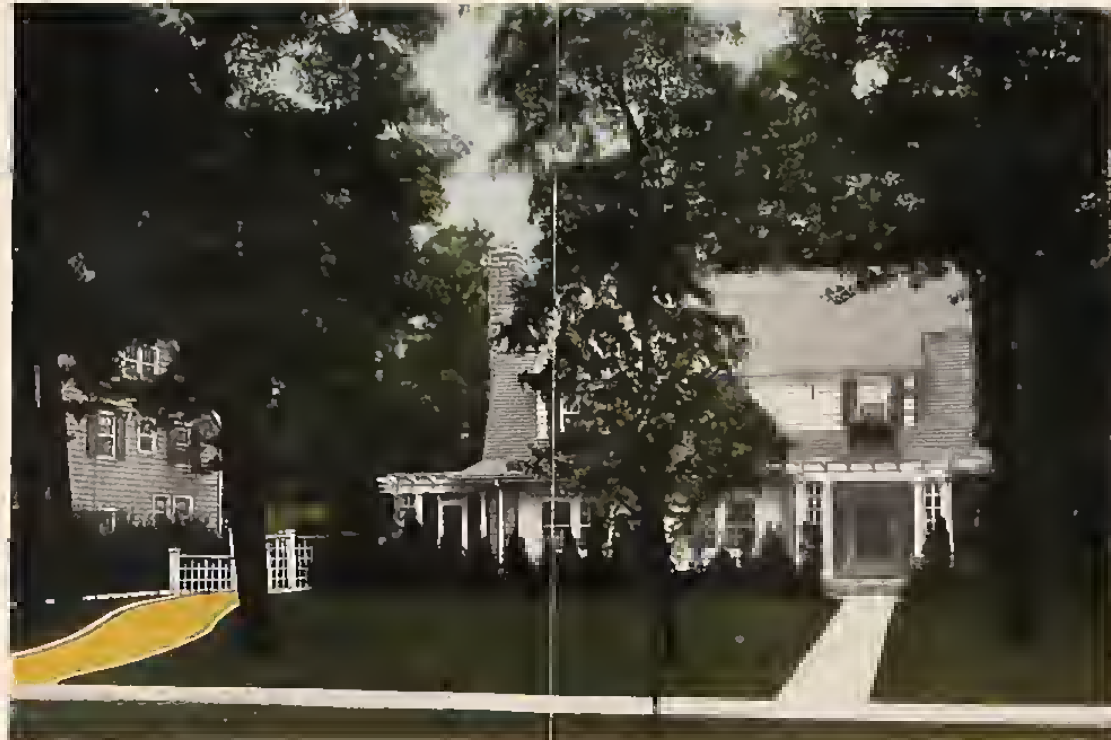

PYRETHRUM, ROSEUM (Perennial)—In the form of a daisy these flowers are admired by all. The flowers bright in color are borne on long stems. Grows 2 to 3 feet tall. Blooms May to July.

65 HARDY PERENNIAL PLANTS FOR \$10.00

THIS Old Fashioned Garden Selection consists of only the cream of the Perennial List and will give your garden a continuous session of bloom from May until freezing. The fact that Old Fashioned Gardens have become so very popular and because many home grounds have been developed without the use of perennials which gives the finished touch and completes your landscape has caused us to put out an Old Fashioned Garden Special. (As our service department does not deliver and plant orders amounting to less than \$20.00 (see page 1), we suggest to those wishing service, that they select additional stock to make a total of \$20.00.)

EVERGREENS: HOW AND WHERE TO USE THEM

Evergreens properly placed and arranged add a charm and dignity to the home that present to the passing public an emblem of character of the home inside.

Those wishing to express these thoughts of loveliness and beauty through the background of landscaping, make no mistake by using evergreens.

Our Mr. Pottenger has given the evergreen situation on the North Shore special consideration. He has been directly interested in the Nursery and Landscape field for more than twenty years. Knowing that evergreens should be kept in a healthy condition, he has worked out a certain set program for the spraying, pruning, cultivation, fertilization of the soil, preparing the beds before planting and arranging varieties that will blend well together.

The varieties we recommend and use are all adapted to Landscape development. All the evergreens in our list have been transplanted three to five times, which is most essential in making a root development that is close and compact, so as to withstand the change of transplanting without showing the effect of having been moved.
